

# **The Hidden Gardens Trust**

## **Vision**

A society where people live, work, play, learn and celebrate together in peace.

## **Mission**

The Hidden Gardens is an inspirational and accessible greenspace that exists to provide a safe place of sanctuary, learning and participation. It works to promote community integration and intercultural dialogue, and to build trust and understanding between people of all cultures, faiths and backgrounds through horticulture, nature, creativity and collaboration.

## **Delivering the mission through annual programme plans**

We work towards realising the vision and mission by offering a safe greenspace for wildlife, citizens of and visitors to Glasgow, for free, six days per week. This distinctive greenspace is at the heart of everything else that we do.

We also offer a creative, festival and events programme for all and a community engagement, learning and volunteering programme for local people.

The work of the Trust is almost always delivered through collaboration and in partnership with others; be it local communities, our neighbours, faith-based communities, schools, community groups, colleges and Universities, national or international bodies or specialist organisations.

For further information about the programmes we currently deliver, visit our website and join our mailing list.
